3P-X-ATAG-1-L: Asset Monitoring Tag Experience Kit

www.3rdPlatform.com
sales@3rdplatform.com

3rd Platform Asset Tag Experience provides an instant out-of-the-box solution to rapidly gain knowledge of the movements and position of remote assets.

This accelerates the investigation and research into asset security and movement patterns.

3rd Platform Asset Tag Diagnostic single node Experience kit:

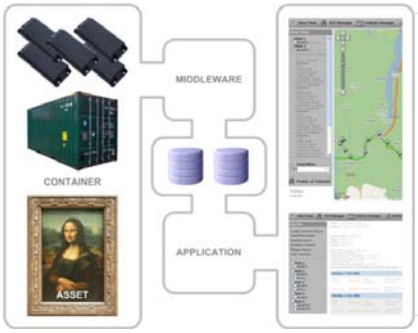
3P-X-ATAG-1-L

Allow for rapid evaluation and deployment of a professional, complete, end-to-end GPRS enabled solution with included full visualisation and reports download for a period of 6 months. Experience can be extended or additional nodes added. Self powered, no electrical connection to the host required, expected battery life varies depending on reporting interval but can last up to 18 months in some scenarios.

Assists in the understanding of the movement and location of your assets, wherever they are in the World (subject to GSM/GPRS coverage), helps identify fraud or illegal movement with geofence and timer based reporting. Helps identify where changes can be made to better ensure the safety or best use of your valuable assets.

Kits are supplied with an SLA (service level agreement) and terms and conditions sign-up required at activation via a web page, these cover fair usage on the Cellular Network SIM, support and web application access.

Included with the kit is a prepaid 6 months contract SIM – the contract can be extended beyond this period, if required, subject to an additional airtime contract being signed.



- Ready to work “out-of-the-box” with a choice of 4 reporting scenarios
- Dynamic changes to reporting structure should battery life decline
- Complete end-to-end professional system
- SIM included
- Individual web portal with username/password
- Includes web based mapping/tracking and downloadable reports
- Expandable
